

# COVID-19 Risk Assessment

ANGLE has completed a comprehensive risk assessment for each of its facilities and areas of operations. These have been designed to meet and where appropriate exceed relevant legislation and good practice guidance but are subject to change as new legislation and guidance is introduced.

The risk assessments have been prepared with the assistance of our external specialist health & safety organisation and have been approved by the relevant internal health and safety committees, which include employee representatives. In addition all staff have received copies of the risk assessments relevant to their area of activity and been offered the opportunity to ask any questions and also invited to contribute any observations that they may have on practical aspects of implementation.

All staff who have returned to work in ANGLE facilities have done so voluntarily.

The Company has made its risk assessments freely available to all parties directly impacted by the assessments.

Aspects of the risk assessments may address competitive operational advantages of the business. Third parties who have a legitimate interest in reviewing the Company's risk assessments may make an application to the Company for access to certain of these assessments.
